Letter of Post-Doctoral Appointment

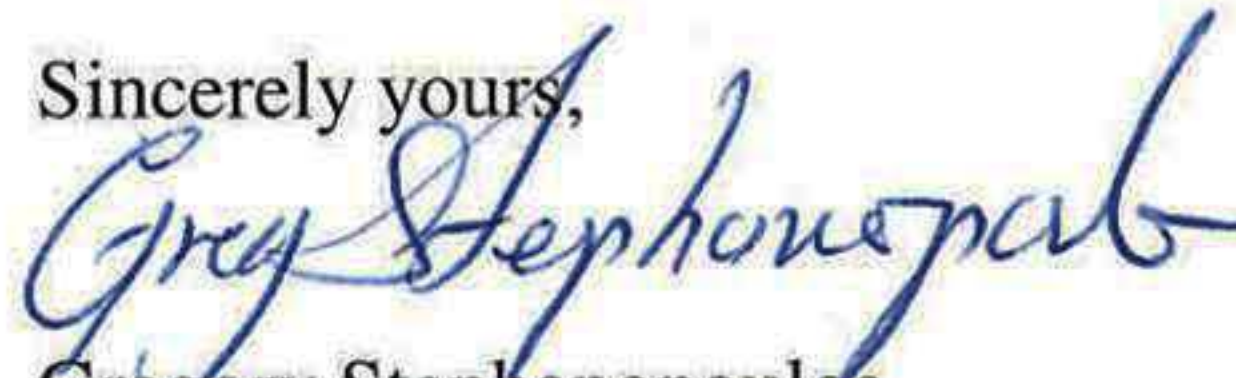

Dr. Savas Anastassiadis was a Post-Doctoral Fellow in my laboratory at the Massachusetts Institute of Technology for a period of two years, from 1994-1996.

During this time, Savas worked on a project devoted to citric acid production, and I was pleased with his work and devotion.

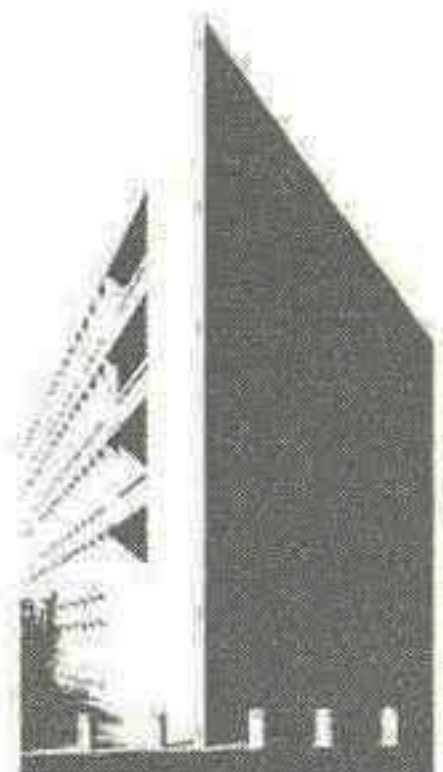

Savas and I met frequently to discuss his progress. He showed great enthusiasm pursuing this research

MIT

Sincerely yours,

Gregory Stephanopoulos
